General Principles of Drug Therapy

"What is Pharmacology?"

A Summary Statement

..."Medical pharmacology is a bridge between basic science and clinical medicine. It makes use of all the disciplines that comprise the scientific foundation of clinical medicine; from anatomy, physiology, pathophysiology, pathology and immunology to biochemistry, molecular and cell biology, epidemiology, genetics and genomics. Hence...it is particularly useful for pre-clinical student to view and engage the subject as a major horizontal and vertical integrator, as it pulls together all the different strands of the basic medical science years and simultaneously introduces one to the cornerstone of modern clinical therapeutics, ie. drugs"...
